STAIRS

Precast concrete is the most accurate and cost efficient stair system. Custom design precision means options and variations to solve any design requirements.

INDUSTRIAL
COMMERCIAL
INSTITUTIONAL
RESIDENTIAL

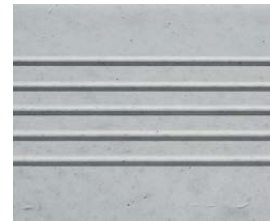

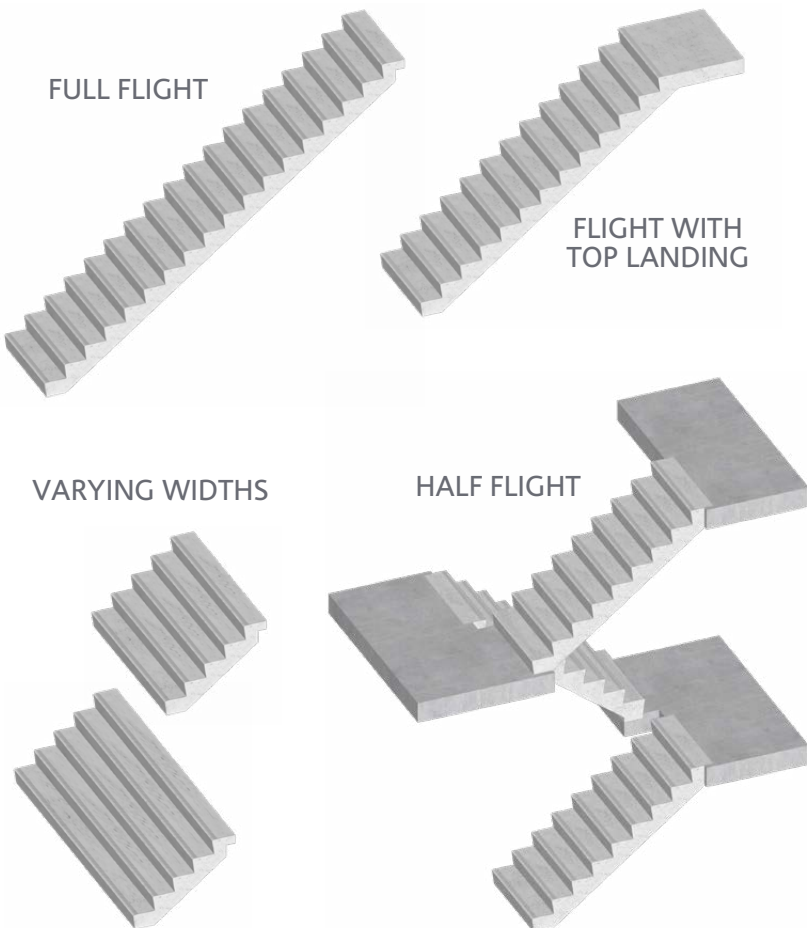

Cast at our facilities using existing molds, our stairs are economical and quality is always consistent. Steel forms create a smooth finish that provides a superior feel and aesthetic over a trowel finish. Our skilled team of draftspersons and engineers provide custom shop drawings for every job.

Concrete steps are delivered to the job-site ready to install on arrival, eliminating the need to build temporary steps.

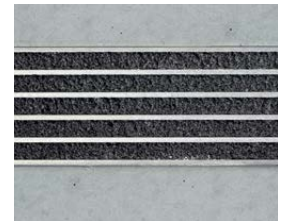

All stairs come with an integrated non-slip tread. Carborundum abrasive strips are optional.

WIDTH | 3' to 8' **RISE** | 2 to 21 risers

FINISHES | Smooth finish with choice of tread

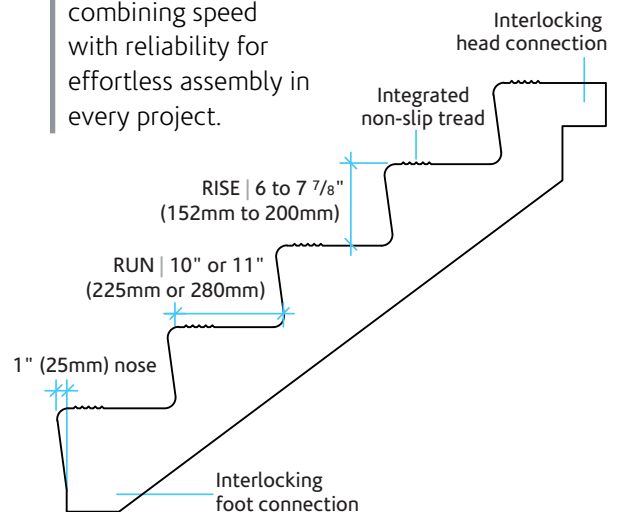

SMOOTH FINISH WITH NON-SLIP TREAD

OPTIONAL CARBORUNDUM ABRASIVE STRIPS

Interlock connections streamline installation, combining speed with reliability for effortless assembly in every project.

LANDINGS

Precast concrete landings are manufactured precisely to the clients' specifications and delivered to the job-site when scheduled.

Eds Concrete has extensive experience manufacturing precast concrete stairs and landings for a wide range of building types. Quality assurance is present at every stage of the process, from laboratory tests of raw materials to a pre-dispatch inspection of every unit.

FINISHES | Smooth finish

QUALITY STANDARDS

- Manufactured in a CPCQA Certified facility to CSA A23.4
- Stringent quality control ensures uniform finish
- Minimum 41 MPA (6000 psi) reinforced concrete
- Load rated lifting inserts
- Two-hour fire rating standard on all units

BALCONIES

Precast concrete balconies last for decades, require no maintenance, and are reinforced as required.

Our precast concrete balconies are manufactured precisely to the clients' specifications. This contrasts to an on-site manufacturing where casting can be problematic and finishes are prone to be affected by adverse weather conditions, sometimes requiring additional remedial work.

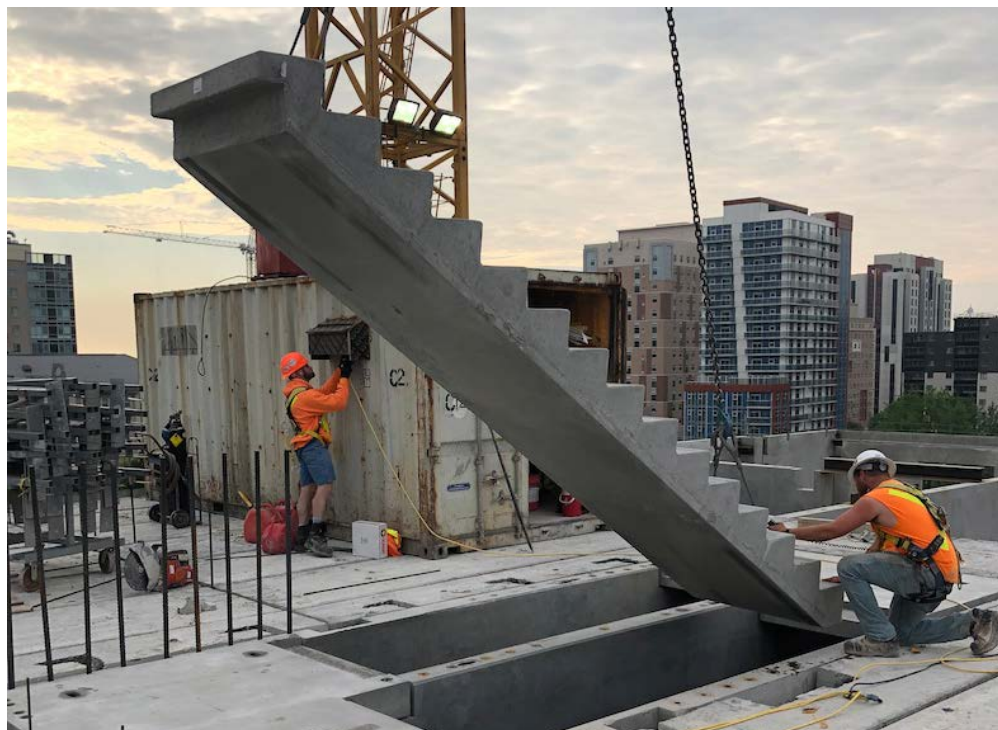

FINISHES | Broom finish

SMOOTH FINISH

BROOM FINISH

WE KNOW CONCRETE

With over 40 years of experience under our belt, we fabricate concrete products using the best of both traditional and today's leading edge technology. ED'S Concrete maintains expansive design and fabrication facilities that support a wide range of custom precast projects. From first contact to product delivery, our motivated team of professionals is dedicated to providing you with an excellent product and attentive customer service, on schedule and within budget.
