
WINDOW WELL SHEET

Lifting Points

- When lifting the window well ensure the following:
 - lifting loops are fully threaded into the inserts
 - lifting straps or chains must be on a 60 degree angle, minimum

LIFTING POINTS

Anchoring

- it is recommended that the foundation wrap be removed from behind the window well and the anchor brackets in order to achieve a proper connection to the foundation wall. Re-seal after installation
 - **DO NOT** over-tighten expansion anchors – over tightening **WILL** cause the window well to crack.
